

BUPT TA Recruitment System — User Manual

Product: Teaching Assistant (TA) Recruitment System
Audience: TA applicants, Module Officers (MO), and System Administrators

Table of Contents

- 1. [Introduction](#)
- 2. [System Overview](#)
- 3. [Accounts, Login, and Registration](#)
- 4. [TA Portal — User Guide](#)
- 5. [MO Portal — User Guide](#)
- 6. [Administrator Guide \(MO Portal\)](#)
- 7. [Application Status Reference](#)
- 8. [AI Features](#)

1. Introduction

The **BUPT TA Recruitment System** is a desktop application that supports the full lifecycle of Teaching Assistant recruitment at Beijing University of Posts and Telecommunications (BUPT). It connects two groups of users:

Role	Full name	Who they are
TA	Teaching Assistant (applicant)	Students who browse open TA positions, maintain a profile, upload a résumé, and submit applications.
MO	Module Officer	Staff who post TA jobs for their modules, review applicants, and make hire/reject decisions.
ADMIN	System Administrator	A designated administrator account with extra tabs for user management, system-wide job control, analytics, and audit logs.

You use one of two programs:

- **TA Portal** — for applicants (with optional guest browsing).
- **MO/Admin Portal** — for hiring staff and administrators (sign-in required when you open the program).

The application also offers optional **AI features** (job recommendations, résumé advice, keyword generation, and analytics insights). These require an internet connection; if a feature is unavailable, the app shows an error message.

2. System Overview

2.1 Two portals

Program	Who uses it
TA Portal	Teaching Assistant applicants
MO/Admin Portal	Module Officers and System Administrators

Use the program that matches your role. TA and MO/Admin accounts are not interchangeable between portals.

2.2 Do I need to log in first?

Portal	First screen	Guest access
TA Portal	Browse jobs (guest mode)	Yes — you can search and read job details without an account. Applying, profile, applications, and AI features require sign-in.

Portal	First screen	Guest access
MO Portal	Sign-in screen	No — you must authenticate before any work.

2.3 Portal separation (important)

Each account type must use the correct portal:

- **TA accounts** → TA Portal only.
- **MO and ADMIN accounts** → MO Portal only.

If you sign in with the wrong portal, an **Error** dialog appears:

- "MO/Admin accounts must sign in from the MO portal."
- "TA accounts must sign in from the TA portal."

2.4 Navigation model

After login (or on the guest dashboard), you navigate using a **tab bar** at the top of the main window. A **toolbar** above the tabs shows your welcome message and **Log in / Log out**.

2.5 High-level workflows

TA applicant

1. Launch TA Portal → browse jobs as guest (optional).
2. Register and sign in.
3. Complete **My profile** (optionally upload a CV and use **AI Fill from CV**).
4. **Browse jobs** → select a job → **Apply**.
5. Track status under **My applications**; **Withdraw** while status is **Pending**.

MO staff

1. Launch MO Portal → sign in.
2. **Post / edit job** → publish a position (optional **AI Generate Keywords**).
3. **My jobs** → manage open/closed state.
4. **Applicants** → review cards → **Hire** or **Reject** → download CVs as needed.

Administrator

1. Sign in to the **MO/Admin Portal** with your administrator account.
2. Use **TA admin**, **MO admin**, **All jobs**, **Insights**, and log tabs.

3. Accounts, Login, and Registration

3.1 Account rules

- Email must be a valid `@bupt.edu.cn` address.
- Passwords are chosen at registration. If an administrator resets your password, it is set to `Pass@123` —use that to sign in, then change it under **My profile** → **Change Password** if you wish.
- **Disabled** accounts cannot sign in.
- Registration is **portal-specific**: TA Portal registers **TA** only; MO Portal registers **MO** only.

3.2 Sign-in screen (both portals)

MO Portal opens directly on the sign-in screen. **TA Portal** reaches the same screen via **Log in** on the guest dashboard or when a protected action requires authentication.

UI element	Description
← (back)	TA Portal only — returns to guest job browser
BUPT Email	@bupt.edu.cn email
Password	Account password

UI element	Description
Sign in	Authenticate
No account? Register	Open registration

Figure 3-1: Sign-in screen

Sign-in dialogs

Situation	Dialog title	Message (summary)
Wrong portal for MO/Admin	Error	MO/Admin accounts must sign in from the MO portal.
Wrong portal for TA	Error	TA accounts must sign in from the TA portal.
Invalid credentials	Error	Message from system (e.g. incorrect password, unknown user)
Empty fields	Error	Validation message (e.g. email or password required)

TA Portal: login notice banner

When redirected from a protected action, a **yellow notice banner** may appear at the top of the login screen ("*Please sign in first.*") and auto-hides after a few seconds.

3.3 Registration screen

Open via **No account? Register** on the sign-in screen.

UI element	Description
←	TA Portal: back to guest browse
Create Account	Heading
Register as TA / MO hint	Role fixed by portal
BUPT Email	Must end with @bupt.edu.cn
Password / Confirm Password	Must match
Register	Create account → success returns to sign-in
Back to sign in	Cancel registration

Figure 3-2: Registration screen

Registration dialogs

Situation	Dialog	Typical message
Empty email	Error	Email cannot be empty.
Empty password	Error	Password cannot be empty.
Empty confirm	Error	Please confirm your password.
Success	Information	Registration succeeded → navigates to sign-in
Failure	Error	Duplicate email, password mismatch, invalid email, etc.

3.4 Change Password dialog (TA and MO)

Opened from **My profile** → **Change Password**.

Field / button	Description
Current password	Verify identity
New password	New secret
Confirm new password	Must match new password
Cancel	Close without saving
Confirm	Apply change
Inline status label	Shows validation errors in red

On success, an **Information** dialog shows: *"Password changed successfully!"*

Figure 3-3: Change Password window

Change Password — feedback

Situation	Feedback	Message or behavior
Empty current, new, or confirm field	Inline (red)	Please fill in all fields
Wrong current password	Inline (red)	Current password is incorrect
New password empty	Inline (red)	New password is required
New and confirm do not match	Inline (red)	New passwords do not match
Account not found	Inline (red)	Account not found

4. TA Portal — User Guide

4.1 TA Portal main window

After launch (guest) or sign-in, the **TA Console** dashboard appears with three tabs:

Tab	Guest	Signed-in TA
Browse jobs	✓ Full access (except Apply / AI)	✓ Full access
My applications	Redirects to sign-in	✓
My profile	Redirects to sign-in	✓

Guest users open on **Browse jobs**. After a successful sign-in, TAs land on **My applications**.

Toolbar

State	Welcome text	Button
Guest	Browse jobs as guest	Log in
Signed in	Welcome, <name>	Log out

Guest tab guard

Clicking **My applications** or **My profile** while not signed in shows a notice and opens the **sign-in** screen with banner *"Please sign in first."*

4.2 Browse jobs

The default tab for guests and the primary job-discovery area for TAs.

Layout

Area	Contents
Search bar	Search by title, module, requirements; Refresh
Job table	Job ID, Title, Module, Posted by, Positions, Applicants, Hired
Job details (right panel)	Title, Posted by, Module, Positions, Dates, Requirements, Notes, Keywords
AI Resume Optimization Advice	Text area + Generate AI Resume Advice
Apply	Submit application (signed-in only)
AI sidebar (bottom/right)	Optional preference text, Reset , AI Recommend Jobs , AI Job Recommendations results

Figure 4-1-1: Browse jobs — full layout overview 1

Figure 4-1-2: Browse jobs — full layout overview 2

Step-by-step: Browse and search

1. Open **Browse jobs**.
2. Type keywords in **Search title, module, requirements** (optional).
3. Click **Refresh** to reload open jobs from the system.
4. Click a row in the job table; details appear on the right.

Step-by-step: Apply for a job (signed-in)

1. Sign in if you are a guest.

2. In the job table, rows for positions you have **already applied** to are shown greyed out and the **Apply** button reads **Already Applied**. All other rows are open positions you can still apply to—select one of those.
3. Review **Job details** and optionally use **Generate AI Resume Advice** to help improve your resume and strengthen your application.
4. Click **Apply**.
5. On success, an **Information** dialog confirms submission; **My applications** updates.

Situation	Dialog
Guest clicks Apply	Redirect to sign-in (<i>Please sign in first.</i>)
Apply succeeded	Information with confirmation message

Figure 4-2: Browse jobs — already applied

Generate AI Resume Advice (signed-in)

1. Select a job.
2. Click **Generate AI Resume Advice**.
3. Advice appears in the **AI Resume Optimization Advice** area.

Figure 4-3: AI Resume Advice generated for selected job

Example — AI Resume Optimization Advice

- 1) Main gaps
- No direct proctoring, monitoring, or exam-related experience
 - Limited evidence of reliability, calmness under pressure, or handling disruptions
 - Weak emphasis on communication (especially verbal instructions), attendance tracking, or protocol adherence
 - Missing proof of punctuality, schedule flexibility, or procedural diligence
- 2) Immediate rewrite suggestions

- Replace "TA" focus with proctor-relevant traits: reliability, observation, procedure-following, calm authority
- Add concrete examples of responsibility, timeliness, or rule enforcement (even non-academic)
- Highlight English fluency and ability to give clear, calm verbal instructions
- Quantify availability (e.g., "available for early-morning/variable shifts") and commitment to briefings

3) Example phrasing

- "Reliable and detail-oriented student with proven punctuality—consistently arrived 30+ mins early for lab setups and deadline-critical coursework."
- "Calm and observant in high-focus settings; monitored peer debugging sessions for 15+ hours/week, identifying subtle errors (e.g., memory leaks, aliasing) before escalation."
- "Fluent English speaker; gave clear, step-by-step verbal instructions during dorm study groups—adapted tone and pace for frustrated peers."
- "Committed to integrity and protocol: followed strict lab safety/checklist procedures, documented all deviations, and reported issues immediately to instructors."

AI Recommend Jobs (signed-in)

1. Optionally enter text under **Additional preference for AI recommendation (optional)**.
2. Click **AI Recommend Jobs**.
3. Matching jobs are highlighted/reordered in the table; results appear under **AI Job Recommendations**. **Reset** clears that output and table highlighting.

Guest users are redirected to sign-in if they use this feature.

Figure 4-4: Browse jobs — AI recommendations displayed

Example — AI Job Recommendations

Top 3 match(es):

1. Programming Fundamentals Help Desk (job002) | Match Score: 85

Directly aligns with Bob's coding focus and systems programming background in C and Linux; his experience debugging segfaults and pointer issues matches the debugging support required for beginners. Though he lacks Java/Python, his deep procedural understanding and patience with foundational concepts make him a strong fit for Programming Fundamentals—especially given his self-identified strength in clear explanations and structured learning via checkpoints.

2. Discrete Mathematics Tutorial Assistant (job010) | Match Score: 62

Discrete Mathematics requires logic, precision, and clear step-by-step reasoning—skills reinforced by Bob's systems coursework (e.g., pointer arithmetic, memory management) and his self-described thoroughness and attention to detail. While not coding-focused, it leverages his analytical rigor and preference for explicit structure, and is more aligned than non-technical roles.

3. Calculus I Peer Tutoring (job026) | Match Score: 48

Calculus tutoring relies on quantitative reasoning and explaining common errors—transferable from Bob's debugging patience and study-group mentoring—but lacks direct coding relevance and assumes stronger formal math application than evidenced in his profile. Score reflects moderate alignment with his teaching style (patience, clarity) but low domain match.

4.3 My applications

Available only when signed in. Lists all applications submitted by the current TA.

Table columns

Column	Description
Application ID	Unique application identifier
Job title	Position name
Module	Academic module
Job Period	Start–end dates of the job
Status	Pending / Withdrawn / Hired / Not hired
Hired Time	Timestamp when hired (if applicable)

Actions

Button	Description
Withdraw	Cancel a Pending application

Figure 4-5: My applications

Step-by-step: Withdraw an application

- 1. Open **My applications**.
- 2. Select a row with status **Pending**.
- 3. Click **Withdraw**.
- 4. In the **Confirm** dialog, choose **OK** ("*Withdraw this application?*").
- 5. Status changes to **Withdrawn**; job applicant counts refresh.

Situation	Dialog
Not Pending	Error: <i>Only pending applications can be withdrawn</i>
Confirm withdraw	Confirm → OK / Cancel

4.4 My profile

Manage your online profile and résumé attachment.

Sections

Resume attachment (Quick start)

Control	Description
Status label	Shows uploaded file name or <i>No file uploaded</i>
Upload CV	Pick a <code>.txt</code> , <code>.md</code> , or <code>.pdf</code> file (file chooser)
Download	Save CV to disk (file chooser)
Delete	Remove attachment
AI Fill from CV	Parse CV and draft profile fields
AI fill status label	Progress / result text

Online profile

Section	Fields
Account Information	Email (read-only), Full name, Phone, Major
Professional Information	Skills, Experience, Self evaluation
Save profile	Persist changes
Change Password	Opens password dialog (Section 3.4)

Figure 4-6-1: TA My profile 1

Figure 4-6-2: TA My profile 2

Step-by-step: Upload and AI-fill CV

- 1. Click **Upload CV**.
- 2. In the file chooser, select a `.txt` , `.md` , or `.pdf` résumé.
- 3. On success, **Information**: "*CV uploaded*".
- 4. Click **AI Fill from CV**; review populated fields.
- 5. Click **Save profile**.

Situation	Dialog
Upload success	Information: <i>CV uploaded</i>
Delete CV	Confirm Yes/No: <i>Delete your uploaded resume attachment?</i> → Info <i>CV deleted</i>
Download success	Information: <i>CV saved to: <path></i>
AI fill failure	Error: <i>AI fill failed: ...</i>

Unsaved changes when leaving profile tab

If you edit profile fields and switch to another tab without saving:

Confirm dialog (Yes/No): "*You have unsaved profile changes. Save before leaving this page?*"

- **Yes** → saves profile
- **No** → discards edits and reloads saved data

Save profile

Click **Save profile**. **Information** or **Error** dialog reports the result; the welcome label updates if your display name changed.

4.5 TA Portal — Log out

Click **Log out** in the toolbar. You return to **guest mode** on **Browse jobs**; session data is cleared from memory.

5. MO Portal — User Guide

5.1 MO Portal main window

After sign-in, the **MO Console** dashboard opens. Standard MO users see four tabs; administrators see additional tabs (Section 6).

Toolbar: Welcome message + **Log out** (always visible).

Tab	Purpose
Applicants	Review and decide on applicants for your open jobs
My jobs	List and manage jobs you posted
Post / edit job	Create new jobs or edit existing ones
My profile	MO account and contact details

5.2 Applicants

Review applications for **your open jobs** only.

Layout

Area	Contents
Job selector	Dropdown: <i>Select an open job</i>
Search	Filter applicant cards
Refresh	Reload applicant list

Area	Contents
Applicant cards	Name, status badge, one-line AI advantage summary (auto-generated), optional ★ TOP MATCH badge after AI recommend
Applicant profile	Detailed TA information for selected card
Download CV	Save applicant's CV
Hire / Reject	Decision buttons (Pending only)
AI Recommend Applicants	Preference, Top N spinner, Reset , AI Recommend Applicants
AI Analysis	Read-only text area for AI output

Figure 5-1: Applicants

Step-by-step: Review and hire

1. Select an **open job** from the dropdown.
2. Scan **applicant cards**; read each card's AI advantage summary to compare candidates at a glance.
3. Click an **applicant card** to load **Applicant profile**.
4. Optionally click **Download CV** (file chooser → save path).
5. Click **Hire**.
6. **Confirm**: "*Hire this applicant?*" → **OK**.
7. If the TA already has **2 or more overlapping hired jobs**, a **Confirm** Yes/No warning lists existing jobs and asks whether to proceed.
8. On success, **Information** shows result; applicant list refreshes.
9. Optionally, **Recommend Similar Candidates** dialog appears (Section 5.2.1).

Step-by-step: Reject

1. Select a **Pending** applicant.
2. Click **Reject**.
3. **Confirm**: "*Reject this applicant?*" → **OK** (or **Cancel** to abort).
4. **Information** or **Error** reports outcome; applicant list refreshes.

Situation	Dialog
Hire confirm	Confirm: <i>Hire this applicant?</i> → OK / Cancel
Reject confirm	Confirm: <i>Reject this applicant?</i> → OK / Cancel
Concurrent jobs warning	Confirm Yes/No with overlapping job list
CV missing	Error: <i>CV file not found</i>
CV saved	Information: <i>CV saved to: <path></i>

Figure 5-2: Hire — concurrent jobs Yes/No warning

AI advantage summary on applicant cards

For each applicant on the selected job, the system **automatically generates a short AI sentence** on that person’s card summarising their main strengths (for example skills or experience relevant to the role). This lets you scan the card list quickly before opening **Applicant profile**.

- While the text is still being generated, the card shows *Analyzing profile...*
- Once ready, the sentence appears on the card under the name and status.
- The same summary is kept on the applicant’s record so it can load faster when you view them again; if the TA updates their online profile or CV attachment, that cached summary is cleared and regenerated the next time you open Applicants.

Figure 5-3: Applicant card — AI advantage summary

AI Recommend Applicants

1. Select an open job with **pending** applicants.
2. Optionally enter preference text (e.g. *prioritise applicants with deep-learning experience*).
3. Set **Top** N matches (1–10).
4. Click **AI Recommend Applicants**.
5. Results appear in **AI Analysis**.

Situation	Dialog
No applicants	Error: <i>No applicants for this job</i>
No pending applicants	Error: <i>No pending applicants for this job</i>

Figure 5-4: AI Recommend Applicants

Example — AI Analysis (AI Recommend Applicants)

Top 3 candidate(s) (from pending):

1. 20230011@bupt.edu.cn (Score: 92)

Strong match: Java expertise, direct experience helping first-year students with rubrics and submission standards, testing (JUnit) and tooling (Maven) alignment with course needs; clear communication focus and self-awareness. No deep-learning background, but MO preference is secondary to core job requirements.

2. 20210010@bupt.edu.cn (Score: 88)

Excellent fit: Java + mentoring experience across bootcamps and study circles, covers recursion, unit tests, CLI workflows — all relevant; emphasizes patience, practical hints, and independent problem-solving. No deep-learning, but strong foundational teaching alignment.

3. 20210026@bupt.edu.cn (Score: 85)

Highly qualified: proven TA for OOP course twice, UML/whiteboarding, design patterns, JUnit/Mockito — directly supports procedural/OO fundamentals and debugging explanations; blog outreach shows teaching clarity. MO deep-learning preference not met, but domain expertise and teaching record are exceptional.

5.2.1 AI Recommend Similar Candidates (after hire)

After you click **Hire** on a pending applicant and confirm *Hire this applicant?*, this dialog can appear whenever you have **finished evaluating that person as someone you would hire**—not only when the hire is recorded. It shows in both cases below:

- **Hire completed** — the applicant is successfully hired (including when you choose **Yes** on the concurrent-jobs warning and the hire goes through).
- **Hire not completed due to workload** — the TA already has **2 or more overlapping hired jobs**, you see the concurrent-jobs warning, and you choose **No** (you decide not to hire this person because of their existing commitments).

In either case, the system treats that applicant as your reference and offers AI suggestions for other **pending** candidates with a similar profile.

Element	Description
Reference applicant	Name of the TA you just hired or considered hiring
Spinner	Number of candidates (1–10), default 3
Yes / No	Proceed or skip

Figure 5-5: AI Recommend Similar Candidates dialog

Figure 5-6: AI Recommend Similar Candidates

Example — AI Analysis (AI Recommend Similar Candidates)

Top 2 similar candidate(s) (based on 20210010@bupt.edu.cn):

1. 20230011@bupt.edu.cn (Score: 92)

Julia He shares Java proficiency, mentoring experience in learning centers, and strong alignment with rubric-based instruction and beginner debugging support. Her work with JUnit, Maven, and assignment rubrics directly matches the job's emphasis on grading support, compiler error walkthroughs, and structured small-assignment help—mirroring Ian Sun's bootcamp mentoring and QA triaging background.

2. 20210026@bupt.edu.cn (Score: 87)

William Schmidt has deep Java and OOP expertise, prior TA experience for OOP courses, and a demonstrated ability to explain foundational concepts (e.g., design patterns via whiteboard examples), closely matching Ian Sun's strength in teaching procedural/OOP basics and mentoring. His workshop facilitation and blog outreach reflect similar pedagogical communication style and patience.

5.3 My jobs

Manage jobs **you** have posted.

Layout

Area	Contents
Search jobs + Refresh	Filter and reload
Jobs table	ID, Title, Module, Positions, Status (Open/Closed)
Job details	Full description, requirements, notes, keywords
Edit	Open job in Post / edit tab
Close	Close an open job
Open	Re-open a closed job
Applicants	Jump to Applicants tab for this job

Figure 5-7: My jobs

Step-by-step: Close or re-open a job

Close

- 1. Select a job with status **Open**.
- 2. Click **Close**.
- 3. **Confirm:** "Close this job?" → **OK**.
- 4. Job status becomes **Closed**; new applications are blocked.

Re-open

- 1. Select a **Closed** job.
- 2. Click **Open**.
- 3. **Confirm:** "Re-open this job?" → **OK**.

Situation	Dialog
Already closed	Information: <i>This job is already closed</i>
Already open	Information: <i>This job is already open</i>
Applicants on closed job	Information: <i>This job is closed. Re-open it before reviewing applicants.</i>

Jump to Applicants

- 1. Select a job → click **Applicants**.
- 2. System switches to **Applicants** tab and pre-selects that job in the dropdown.
- 3. If the job is closed, you see the re-open reminder instead.

5.4 Post / edit job

Create a new posting or edit an existing one.

Form sections

Section	Fields
Header	New job or existing Job ID label
Basic Information	Job title, Module, Positions, Start date, End date
Job Details	Requirements (large text), Notes (large text), Keywords
AI Generate Keywords	Fills keywords from requirements/notes
Clear	Reset form for a new job
Save	Create or update job

The screenshot shows the 'Post / edit job' form for a new job. The form is titled 'New job' and includes sections for Basic Information, Job Details, and AI Generate Keywords. The Basic Information section contains fields for Job title, Module, Positions (a dropdown menu with '1' selected), Start date, and End date. The Job Details section contains fields for Requirements, Notes, and Keywords. The AI Generate Keywords section has a button labeled 'AI Generate Keywords'. The form is displayed in a web browser window with the title 'BUPT International School TA Recruitment' and a user profile 'Welcome, Dr. Richard Evans'.

Figure 5-8: Post / edit job — new job form

The screenshot shows the 'Post / edit job' form for editing an existing job. The form is titled 'Edit: job001' and includes sections for Basic Information, Job Details, and AI Generate Keywords. The Basic Information section contains fields for Job title (Data Structures Lab Assistant), Module (Data Structures), Positions (a dropdown menu with '4' selected), Start date (5/1/2026), and End date (7/15/2026). The Job Details section contains fields for Requirements, Notes, and Keywords. The AI Generate Keywords section has a button labeled 'AI Generate Keywords'. The form is displayed in a web browser window with the title 'BUPT International School TA Recruitment' and a user profile 'Welcome, Dr. Richard Evans'.

Figure 5-9: Post / edit job — editing existing job

Step-by-step: Post a new job

1. Open **Post / edit job** (or click **Clear** if the form has leftover data).
2. Fill **Job title**, **Module**, **Positions**, **Start date**, **End date**.
3. Enter **Requirements** and **Notes**.
4. Optionally click **AI Generate Keywords** (wait for *Generating...* to finish); you may also edit keywords manually.
5. Click **Save**.
6. **Information** or **Error** confirms outcome; job appears under **My jobs**.

5.5 My profile (MO)

Section	Fields
Account Information	Email (read-only), Full name
Contact Information	Phone
Professional Information	Responsible modules (text area)
Save profile	Save MO profile
Change Password	Same dialog as TA (Section 3.4)

Figure 5-10: MO My profile

5.6 MO Portal — Log out

Click **Log out** → returns to **sign-in** screen. Unsaved work in forms may be lost; save jobs and profile first.

6. Administrator Guide (MO Portal)

Sign in to the **MO/Admin Portal** with your **administrator account**. The dashboard adds **six administrator tabs**; the default selected tab is **TA admin**.

Tab	Purpose
TA admin	Manage all TA accounts
MO admin	Manage MO accounts (admin account excluded from list)
All jobs	View and close/open any job system-wide
Insights	Analytics dashboard and 30-day AI insights
Account Management Log	Audit trail for user admin actions
Job Management Log	Audit trail for job admin actions

6.1 TA admin

The screen is split into a **left** TA accounts list and a **right** detail panel. Click a row on the left to select that TA — the selected row is highlighted **blue** — and the right side shows that person’s **Jobs Applied** and **Jobs Hired** tables (application and hire history).

Left — TA accounts table: Name, Phone, Email, **Ongoing Jobs** (currently in-progress hired positions), **Applied** (how many jobs they have ever applied to, including ended jobs), **Hired** (how many jobs they have ever been hired for, including ended jobs), Status.

- Rows with a **light red** background indicate the TA has **more than 2** ongoing hired jobs (the workload warning threshold is **2**). This flags that the person may already be under heavy commitment; take it into account when hiring. The same rule triggers a **Confirm** warning when an MO tries to **Hire** that TA and they already have **2 or more** overlapping hired jobs (see Section 5.2).

Right — TA Details

Table	Content
Jobs Applied	Jobs this TA has applied to (non-withdrawn applications)
Jobs Hired	Jobs where this TA was hired — Hired Time , Work Period

In **Jobs Hired**, rows for jobs that are **currently in progress** (today falls between the job’s start and end dates) are highlighted **blue** so you can spot active assignments at a glance.

Actions

Button	Effect
Reset password	Resets the user’s password; Information dialog shows the new temporary password, which is Pass@123 by default.
Enable / disable	Toggles account; Information confirms

Figure 6-1: TA admin

6.2 MO admin

Same layout pattern as TA admin for **MO accounts** — Name, Phone, Email, Classes, Status.

Right panel: MO Details and **Classes/Jobs** table (Job ID, Job Name, Positions, Hired, dates, Status).

Button	Effect
Reset password	Resets the user’s password; Information dialog shows the new temporary password
Enable / disable	Toggle MO account

Figure 6-2: MO admin

6.3 All jobs

System-wide job table: Job ID, Title, Module, Name (MO), Email, Positions, Hired, Start/End Date, Status.

Button	Effect
Close Job	Close selected job (any owner)
Open Job	Re-open selected job

Dialogs mirror MO **My jobs** close/open confirms and information messages.

Figure 6-3: All jobs

6.4 Insights

Embedded analytics panel (not a separate popup window).

Section	Description
Metric cards	Total Jobs, Open Jobs, Applications, Hired, Hire Rate
Applications by Module	Scrollable list; Sort by Name / Sort by Count
Hiring Status Distribution	Bar chart
30-Day Insights	AI-generated narrative; Refresh reloads

Figure 6-4: Insights

6.5 Account Management Log

Read-only table: Time, Admin, Action, User Email, Role, Before, After.

Button	Effect
Clear Log	Confirm: <i>Clear all account-management log entries? This cannot be undone.</i> → Information on success

BUPT International School TA Recruitment
